SINGLE-SHOT RIFLE K5

MERKEL 

MINIMAL ART

The art of making a single-shot rifle

The minimalist look and feel of the new K5 has been created by the Suhl gunsmith Franz Jäger and his tilt-ed-block system (1906). The design of the tilted block when manufactured is extremely short and locks tight, steel on steel, as always the case with Merkel. The K5 is a technical refinement of the single shot rifle, with a new line out of stock, through the action and barrel which improves the functionality, making it easy and fast to handle with a weight that begins at a mere 2.3kg /5.1lb.

The tilted-block action
is the centrepiece of the K5:
It locks steel on steel, is of
an extremely light build,
short – and is very safe.

100 PERCENT DYNAMICS – THE NEW LINE OF THE K5

The new K5 rifle from Merkel is the thinnest actioned single shot rifle in our production, trimmed to a dynamic elegance but with still with 100% functionality! The exciting newly defined lines of the rifle begin at the butt of the stock, rising over its light Hogs-back comb, through its slender action to an elongated rosewood fore-end and through onto the 17mm thick barrel ... Like a predator ready to pounce!

K5 SINGLE SHOT RIFLE

CALIBRE: Refer to table on back **BARREL LENGTH:** Standard calibre barrel lengths 56cm and 51cm (fluted), Magnum calibre 60cm **OVERALL LENGTH:** 97cm at 56cm barrel length **WEIGHT:** starting at 2,3 kg **WOODCLASS:** starting at 4.

THE PERSONAL K5 – A CHOICE OF VARIETIES

EDITION BLACK / EXTREME

Black action with K5 logo, the Extreme Edition has a fluted barrel. Wood grade: starting at 4.

EDITION ARABESQUE

Action with hand-engraved arabesque decoration. Wood grade: starting at 4.

EDITION JAGD

Action with game engraving, different hand-engraved motifs. Wood grade: starting at 4.

EDITION CUSTOM

Action with individual hand engraving to suit the clients' bespoke requirement, the rifle is hand finished. Wood grade: starting at 6.

FOR STALKING AND MOUNTAIN HUNTING

As icon of hunting culture, the single-shot rifle K5 stands for the higher accolades of stalking and mountain hunting. This single-shot rifle is a precision instrument – developed in the spirit of reduction. One barrel, one shot: Lighter, handier, more compact and more consequent hunting is not possible. The single shot rifle stands as an icon within our hunting culture, and our K5 achieves the highest accolade for stalking and mountain hunting. This single shot rifle, developed in the spirit of reduction, is a gossamer light, precision instrument.

BARRELS

A variety of calibres with 3-barrel lengths: 56 and 51 cm for standard barrels (51cm always fluted) and 60cm for magnum calibres.

i-SIGHT SYSTEM – SUPPRESSOR SUITABLE

The 17mm diameter barrels possess the universal i-Sight System with a cap-covered M15x1 muzzle thread. Using a single Allen-key screw, front and rear sight can be detached, the front sight can also be moved backwards – depending on whether shooting is done with a suppressor, without sights or with a muzzle break.

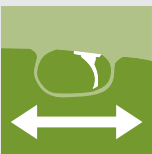

SCOPE MOUNT

The Suhl tilt-up mount (SAM) guarantees a low line of sight, the highest shot stability and consistent target impact points.

HAND-COCKING SYSTEM

Maximum safety against mis-handling: The new silent cocking slide works without much use of strength due to its perfect design.

TRIGGER

The fully adjustable, direct trigger is titanium nitride coated and perfect for precise accurate shooting at distance as one would expect from a mountain rifle, it also has a factory (pre-adjusted) trigger pull of 600g /1.3lbs trigger weight.

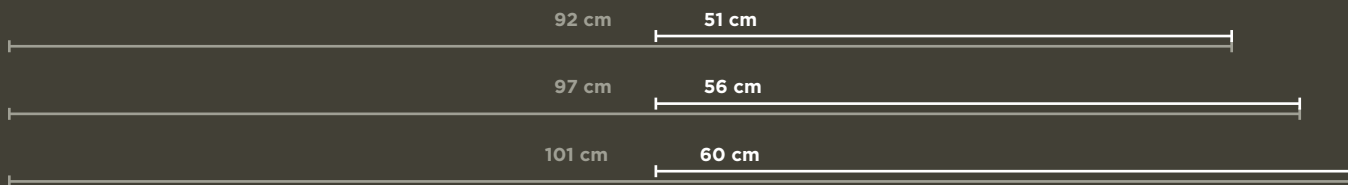

FINELY CARVED

The walnut stock with a slight hog's-back comb and a Bavarian double fold cheek piece - available in a left- or right-hand version. Shown here as the Lady-DS version.
